

A breath of simplicity

High Definition Media Box & Media Dock

Compact and powerful

Wyplay once again sets the standard in High Definition Media Centers with the unveiling of its newest generation, fully modular HD Media Box & Media Dock.

Ideally suited to the requirements of the retail market, Wyplay's HD Media Box can be supplied either as a turnkey product ready for distribution or customized to fulfil specific individual retailer requirements.

Nowadays consumers collect, manage, and view an ever-increasing quantity of digital video, music, and photos, but are unable to easily enjoy it on their TVs. Wyplay's newest generation HD Media Center delivers unmatched playability from the convenience of the TV regardless of source: local or remote hard-disks, removable USB devices, via the home network, personal computer, and the internet. Wyplay's signature user interface is highly customizable and delivers an unsurpassed level of elegance and simplicity at the end-user's fingertips.

Inside the Media Box lies a powerful media center core and a full suite of optional embedded features that include: WIFI n (for home networking and internet services), analog acquisition (archiving legacy movies), transcoding (export any media to any portable hand-held device), and single or dual DVB-T tuners. Add the optional Media Dock and customers then have the most complete media center available.

Delivered in a stylish and compact casing, the Media Box can be extended with the Media Dock including a DVD player/burner, Blu-ray Disc (BD) player, all-in-one memory card reader, and additional storage capacity.

Choosing Wyplay as a partner guarantees a highly differentiated product offering that will serve to reinforce your corporate brand.
