

Wyplay strengthens its Canal+ Group partnership with new project for nc+ in Poland

Marseille, France, and Warsaw, Poland – January 7th, 2015 – Wyplay, creator of software solutions for pay TV operators, and nc+, the most technically advanced digital TV platform in Poland, today announced their collaboration on an upcoming project.

Part of the Canal+ Group, nc+ in Poland is the second largest market for the Group, after France, with 2.2 million subscribers. nc+ operates an advanced digital TV platform with the widest exclusive film and sports offer, as well as a unique selection of premium channels, including eight channels from the CANAL+ family.

Wyplay and Canal+ Group have been successfully working together for more than 2 years where Wyplay provided Canal+ with the software update of the terrestrial and satellite G5 boxes and contributed to the development of the new “Cube S” set-top-box unveiled previously in 2015.

Wyplay now strengthens its partnership with the Canal + Group by developing for nc+ a new product. This new project illustrates the synergies made possible by the adoption of Wyplay’s Frog solution by Canal+ Group, allowing faster development through reuse of common software components and economies of scale thanks to Frog’s support for multiple hardware platforms.

Jacques Bourginaud, CEO of Wyplay, declared: “This new project with nc+ exemplifies the benefits that pay TV operators gain with Frog: ability to leverage a proven solution as a foundation to specific customizations and innovations for nc+ that can be deployed faster to subscribers.”

###

About nc+

nc+ platform is technologically the most advanced digital platform in Poland with the widest exclusive film and sport offer, as well as a unique selection of premium channels, including eight channels of CANAL+ family and several other thematic channels. nc+ platform was created by merging the leaders of Polish television market – digital platforms: “CYFRA+” and “n”. nc+ is part of the Canal+ Group.
