

## **Ekioh joins Frog by Wyplay increasing operators' choice of browser to support high value HTML5 OTT applications.**

Wyplay today welcomes Ekioh as new Licensee, joining more than 125 companies in the Frog by Wyplay Community. Ekioh is specialising in enhanced browser provision for TV and embedded devices, and brings its expertise and product offering to the Frog by Wyplay community in order to offer more choice beyond Frog's built-in Qt-based Webkit browser for operators wanting to add high value HTML5 applications to their Frog deployments.

Many device manufacturers within the Frog Community already rely upon Ekioh for enhanced HTML5 support within their product lines, providing an excellent foundation for further integration. Ekioh's TV Browser is extremely efficient in its processing use and has a very compact footprint making it an ideal choice for providing enhanced HTML5 support on both 2D and 3D hardware. The company also has a great track record in helping device manufacturers to secure YouTube™ certification.

Frog by Wyplay is the first independent open source software solution for pay-TV operators. The initiative brings together a growing ecosystem of more than 125 companies across the entire digital TV technology value chain including chipset vendors, device manufacturers, independent software vendors, software development and integration services providers and operators. This comprehensive solution includes access to the complete Frog source code and all the supporting components to build TV operator's products.

### **About Wyplay**

Independent and internationally recognized, Wyplay develops open, modular and innovative software solutions for IPTV, cable, satellite and terrestrial TV operators and broadcasters around the world. Wyplay's technology enables operators to select, configure, and deploy solutions easily from the richest list of preconfigured functionality available in a modular online TV solution, including an electronic program guide; video recorder; multiscreen and multiroom connectivity, an application store; and more.

Wyplay's professional services team creates user experiences that exactly match and complement an operator or broadcaster's product and market strategies. Wyplay is now a strategic partner for such leading brands as SFR, Vodafone, Proximus, Canal+, Sky Italia and DishTV.

Play the difference

*The foundation of an excellent user experience*

## **About Ekioh**

Ekioh designs and develops user interface software for embedded systems. Ekioh's products include the Ekioh UI Engine which delivers fast, responsive user interfaces based upon the SVG standard; the Ekioh TV Browser which supports the latest HTML5 features in a highly compact footprint; and the Ekioh Twin Engine Browser which fuses UI performance and HTML5 features to create the ideal embedded browser. Ekioh's partners include Arris, Beenius, Ericsson, Nagravision, Sagem, Technotrend, Vestel, Zebra Technologies, Zenterio and ZTE.

Based in Cambridge, UK, Ekioh ([www.ekioh.com](http://www.ekioh.com)) makes it easy to develop compelling user interfaces for consumer devices. The Ekioh team has many years of experience developing user interface software for embedded systems, including JVMs and JavaTV, HTML and SVG. Ekioh has been recognised with Queen's Awards for Enterprise in both Innovation and International Trade categories.
