L&T TECHNOLOGY SERVICES joins the Frog by Wyplay ecosystem

Global systems integration powerhouse to provide end-to-end integration and software development services to digital TV operators using Wyplay's open source solution

CES - LAS VEGAS, January 7th, 2014 – Wyplay announces today that L&T TECHNOLOGY SERVICES, the engineering services arm of the Larsen & Toubro Group, has joined the Frog by Wyplay community and is offering end-to-end integration, development and user experience design services based on Wyplay's technology.

Frog by Wyplay is the first independent open source software solution for pay-TV operators. This comprehensive solution, based on Wyplay's technology currently deployed in more than 10 million set-top boxes, includes all the components to build operators' products with access to the complete source code.

Frog by Wyplay is bringing together a growing ecosystem of companies across the entire digital TV technology value chain: chipset vendors, device manufacturers, independent software vendors, software services providers and operators.

L&T Technology Services provides a one-stop-shop offering for operators when it comes to creating their digital TV solutions based on the Frog by Wyplay solution. L&T Technology Services covers the whole spectrum of activities: from device hardware, middleware and conditional access systems integration, up to application development and user interface design.

Speaking on this occasion, Dr. Keshab Panda, Chief Executive, L&T Technology Services, said, "We're happy to be partnering with Frog by Wyplay and be part of this community which gives us access to the larger digital TV ecosystem".

"L&T TECHNOLOGY SERVICES's global scale and capability to handle operator projects end-to-end are a perfect fit within the Frog by Wyplay community" said Wyplay CEO Jacques Bourginaud. "We are looking forward confidently to L&T Technology Services teams delivering successfully in all key areas required for TV operator projects."

Frog By Wyplay is officially launched at the CES Las Vegas tradeshow in January 2014.

The source code and documentation are available at www.FrogByWyplay.com.

About Wyplay

Independent and internationally recognized, Wyplay develops open, modular and innovative software solutions for IPTV, cable, satellite and terrestrial TV operators and broadcasters around the world.

Wyplay's technology enables operators to select, configure, and deploy solutions easily from the richest list of preconfigured functionality available in a modular online TV solution, including an electronic program guide; video recorder; multiscreen and multiroom connectivity, an application store, and more.

Wyplay's professional services team creates user experiences that exactly match and complement an operator's or broadcaster's product and market strategies. Wyplay is now a strategic partner for such leading brands as SFR, Vodafone, Belgacom and now Canal+.
